JOBS AT SEA

Choose one of the seafaring positions below and write an advertisement for a job vacancy. Use the headings to help you. Look at the classifieds in your newspaper to see some examples of job vacancy ads.

Job title; Employer's name; Outline of job role (full-time, part-time, permanent or a short-term contract) and purpose; Qualifications and experience required; Response and application instructions; contact details for example, address, phone, fax, email,

Engineers are primarily responsible for the safe mechanical operation of a vessel. Essentially, they are responsible for operating and maintaining a vessel's structure, machinery and equipment to make sure the vessel is functioning safely and effectively at all times.

Stewards are responsible for the cleanliness and liveability of crew accommodations and will assist the marine cook with ordering stores including food and general amenities.

Deckhand assists in berthing and un-berthing vessels, maintenance duties such as cleaning and painting and assisting with watch-keeping.

Tug Masters operate boats that assist with the berthing and un-berthing of large vessels particularly in harbours.

Salvage crew work to save a vessel/cargo/people from peril at sea or to prevent environmental pollution. Roles include deep-sea divers, crane-operators, naval architects and engineers.

The Captain is the ship's highest officer, acting on behalf of the ship's owner. The captain is in command and is legally responsible for the day-to-day affairs of the ship and to ensure that all the departments perform legally to the requirements of the ship's owner. Sometimes referred to as Master.

ACTIVITY 6

NEWS IN THE SPOTLIGHT

In Knots

When aboard the schooner South Passage sailors may be required to tie knots. Have a go at tying theses knots using a length of rope.

Figure 8 Knot

Pass the tail over itself to form a loop. Continue under and around the standing end. Complete the knot by passing the tail down through the loop.

Is a stopper knot to prevent end of rope sliding through a pulley.

Bowline

Form a small loop in the rope (a).

Bring the free end up to and pass through the eye from the underside (a -the rabbit comes out of the hole).

Wrap the line around the standing rope and back down through the loop (b -around the tree and back down the hole). Tighten the knot by pulling on free end while holding standing line.

Makes a secure loop in the end of a rope Used to secure a line to a ring or a post.
