WHILE watching a film on the big screen at the cinema is a great experience, we live in an age of home entertainment and there are many great movies we can watch with the family gathered around the television set.

Sometimes the most difficult part about watching a movie is choosing what you are going to watch because of the amount of choices available.

Film reviews are useful as they tell you about the storyline and give you a judgment about the quality.

Be sure to browse your newspaper for movie reviews and the many websites dedicated to giving recommendations.

Writing a movie review

The overall purpose of a movie review is to recommend whether it's worth watching.

The review should give enough details about the movie that the reader can make an informed decision, but it is important to remember a film review is an opinion and only meant to be a guide.

- A review needs to:
- tell people who is in the film, who it is by and where or when readers can see it.
 - describe the story, characters and some of the action - without giving too much away.
 - give an opinion on whether the film is good or not and why the reader should or should not see it.
